**SUBJECT: Fire protection and emergency response in Lincoln County*****SUMMARY***

Each community in the county has its own fire department. (Marge Gunn, the county's emergency management contact would be able to answer more specific questions about each department's equipment and employees. She also has information on emergency health plans.) The county commissioners are forming a county-wide fire district that will be solidified within the next six months. This fire district would increase protection in high-risk areas, such as the Mt Wilson area. Caliente's level of protection would stay the same unless population increases (currently there are 25 volunteers).
